Profile

Frontend developer with 3 years of experience, having ownership of many projects that were gone successfully into production. My mission is to deliver the best UI/UX to users.

Skills

HTML5, CSS3, Javascript, Typescript, React.js, Next.js, Gatsby, REST APIs, GraphQL, Sass, Stylus, Wordpress, JQuery, PHP, Figma, AdobeXD, Trello, Jira, Bitbucket, Git.

Work Experience

Frontend Developer at **Tiki** – May 2022 – Present
Tiki is a digital agency, where I work closely with designers and backend developers delivering the best UI and performance for our clients, using a lot of different technologies such as HTML, CSS, Typescript, JavaScript, React, Next.js, Gatsby, Wordpress.
At Tiki I'm proud to have done:
   - I have built and maintained the front-end of more than 30 websites.
   - I took part in building the website of the multi-million dollar company LWSA (https://lwsa.tech/)
   - I developed an online platform for managing sponsor booths to the largest marketing event in Latin America - RD Summit.

Frontend Developer at **Dot Digital Group** - April 2021 - April 2022
Implementation and maintenance of e-learning courses developed with HTML, CSS, and jQuery. The teams consist of designers, project managers, and frontend developers. Designers create prototypes in Adobe XD, and as a frontend developer, my role was implementing the client-side of the web application.

Education

Degree in System Analysis and Development - Univali - 2022
